-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: reference number 10 as shown in Figure 1; reference number 12 as shown in Figure 1; reference number 14, as shown in Figures 2 and 5. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Regarding claim 4, the phrase "or the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

*Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamaguchi 2,954,617 or Raczka 4,271,605.

Yamaguchi '617 discloses all the limitations substantially as claimed including the following: (see Figure 1) a sandal (Figure 1); a sole portion (2a); an elastic foot covering portion (1a, 12a); rear strap portion (6a); sole portion being thin and flexible (see col. 1, lines 52-57) having a non-slip surface making contact with the floor; sole portion covers arch and ball but not toes or heel (see Figure 1); elastic foot covering attached to sole portion at each side edge (see Figure 1); the strap portion attached to the rear edge of each side of the elastic foot covering (see Figure 1); the sandal can removably retain an orthotic device between the bottom of the user's foot and the top inner surface of the sole portion (see flexible insole 13a); the foot covering includes a visual indicator (strip in center of front portion) in the form of a centrally located binding that is parallel to the length of the user's foot; the sandal is thin enough that it can be placed inside a user's shoe while retaining one or more orthotic devices (see Figure 1).

Raczka '605 discloses all the limitations substantially as claimed including the following: a sandal (see Figure 1); a sole portion 12; an elastic foot covering portion 16; rear strap portion 14; sole portion being thin and flexible (fabric panel) having a non-slip surface making contact with the floor; sole portion covers arch and ball but not toes or heel (see Figure 1); elastic foot covering attached to sole portion at each side edge (see Figure 1); the strap portion attached to the rear edge of each side of

the elastic foot covering (see Figure 1); the sandal can removably retain an orthotic device between the bottom of the user's foot and the top inner surface of the sole portion (pad 20); the foot covering includes a visual indicator in the form of a centrally located binding (where hook and loop strips come together) that is parallel to the length of the user's foot; the sandal is thin enough that it can be placed inside a user's shoe while retaining one or more orthotic devices (see col. 5, lines 59-61).

### *Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and cited on Form 892 enclosed herewith.
